

Q-1 Create a simple HTML file named myprofile.html that displays your name, a short bio, and a profile picture using appropriate HTML tags (h1, p, img). Open it in your browser and view the result.

Ans:-

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width,
initial-scale=1.0">
  <title>My Profile</title>
</head>
<body>
  <h1 >My Profile</h1>
  <h2>Name:Hasib Lakdawala</h2>
  <h2>Bio:</h2>
  <p>
    My name is Hasib Lakdawala, and I am from Surat.<br>
```

There are three members in my family, including myself, and I have one elder sister.

I completed my 10th standard from Alfesanee School in 2020 and my 12th standard from M.M.P. High School in 2022. I am a BCA graduate from Z.S. Patel College, affiliated with VNSGU.

Currently, I am pursuing a Full Stack Python Development course from Tops Technology.

My strengths are that I am a quick learner, self-motivated, and have good problem-solving skills. I also have good time management skills and enjoy learning new technologies.

Talking about my weakness, I sometimes take a little extra time to solve a problem because I want to find the best solution. I am working on improving my speed and managing my time better. I also get nervous while speaking in front of a large audience, and I am actively improving my public speaking skills.

My current goal is to learn industry-relevant skills and start my career in an IT company to gain practical experience. After five years, I

see myself in a higher position with strong technical expertise, and I would also like to explore freelancing opportunities in the future.
